# DESKS CROSS

*High durability and practicality.*

Height adjustment

Completely hidden cables

Metal legs in three options

## Desktops

The desktops of the HOBIS Cross line of desks are shaped to maximize desktop surface area usage and facilitate the optimal position of your PC monitor. To further enhance comfort, we also offer corner versions with ergonomically shaped desktops that comply with the ČSN EN 527-1 standard.

The desktop is 25mm thick with 2mm ABS edges, which protect the desk against damage. A practical bushing takes care of PC and desk lamp cables, guiding them under the desktop where they are hidden in cleverly constructed trays. So you can be sure that cables will not get tangled and will not bother you during work. The desk structure meets strict quality and ergonomic demands (ČSN EN 527-1) and complies with ČSN EN 527-2, ČSN EN 12521, ČSN EN 15372, ČSN 910001 and ČSN 910100.

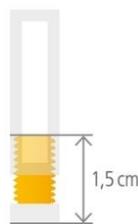

## Legs

Modern metal legs will attract you with their modern design and functionality. Your PC and other cables will be cleverly managed from the desktop by routing inside the plastic leg cover, in which cables can be routed to floor-level. The legs are height adjustable, which facilitates the compensation of floor unevenness by up to 1.5 cm. Your desktop will therefore always be perfectly level. The legs are connected by an 18mm thick laminated chipboard, which provides for desk stability.

You can choose from two leg designs in two colours – black and grey. The plastic panel is an anthracite colour.

## Assembly

The HOBIS Cross line has 47 parts which you can combine thanks to a simple connection system. So you can compose your desk configuration precisely to your needs and add more components at any time. The connecting system is automatically part of every component. Transport efficiency is provided for right to your office, where parts are delivered safely packaged. A simple user manual is included with every delivery.
